

AIR PURIFICATION IS EXCEPTIONAL AT THE HEALTHCARE INSTITUTION IN THE NETHERLANDS

- Air purifier **MAC500s**
-  **99,9%** airborne virus reduction
-  No filters needed
-  Eco-Friendly

“We installed JIMCO MAC500s in our care institution. The residents have dementia and have challenges following guidelines to mitigate the risk of being infected with corona virus such as keeping distance and sanitizing hands. Since the installation in the beginning of 2021 (1 year ago) we have not had any outbreak of COVID-19.

We are extremely satisfied with JIMCO’s products, and we believe they have made all the difference. Other institutions in our area have had outbreaks of COVID, so we are confident that installing JIMCO was the right decision. Now we know that the MAC500s will also help protect us for any future mutation of the virus and the recurring flu virus. The return on investment here is very good. I believe any nursing would benefit and actually save money by installing the MAC500s”

- Dieter Feldkamp, Healthcare provider „Innkeeper Sint Joost“

MAC500s can be used in any room 24/7
The air purifier has documented effect
